

Standard Configuration
Model: SLA-2-SH

Material: ASTM A-36 (Other materials available upon request)

Finish: Hot dipped galvanized to ASTM standard A123 (Other finishes available upon request)

Available Diameters: 3/8", 1/2", 5/8", 3/4", 1.0", 1.25"

Available Lengths: Dimensions shown are typical. Anchors can be built to the design specifications of your project

Manufactured: Minnesota, USA

Notes:

1. To properly install anchors either an engineer or architect should be consulted to determine the proper depth of concrete per soil condition.
2. Anchor pullout strength may vary depending on soil condition.
3. All dimensions are in inches.
4. Due to metal "spring back" during fabrication, slight variations in the finished dimensions are possible.
